ASTRALPOOL – **CHLORINE SHOCK GRANULATE**

Chlorine treatment for water recovery

· Fast-dissolving
· Stable chlorine, lasts longer in the water
· Does not modify pH

GRANULATED	MEASURING CUP	DURATION	ALL TYPES, SPECIAL LINER AND POLYESTER	DOSAGE
		1" Immediate		150g / 10m³

PROPERTIES

Appearance	Granular solid
Colour	White
pH (1%)	6,5 ± 1,0
Solubility	28 grs. / 100 ml

CHARACTERISTICS

Owing to its high solubility in water the required quantity of residual chlorine is rapidly obtained.
It is especially suitable for the disinfection of a pool made of polyester or vinyl because this product doesn't discolours these surfaces.
The ease with which it dissolves in water, means the disinfection of the pool water may be automated using a metering pump.
The free residual chlorine obtained in the water offers higher stability against ultraviolet light.

INSTRUCTIONS FOR USE

Adjust the pH correctly before applying any product to maximize its effectiveness.
Introduce the necessary dose of product inside the skimmers and then turn on the filter equipment; in this way the product will dissolve when it begins to move through the skimmers.

It is also possible to pour the dose of product equally over the surface of the swimming pool, preferably during the evening and when there are no swimmers in the pool.
The level of free residual chlorine should be between 0,5 – 2 mg/l. This level is easily determined using a chlorine and pH test, and should be measured at least twice daily.

DOSAGE

Initial Treatment: Add 15 grs. of ASTRALPOOL – Chlorine Shock for each m^3 of water. After 2 hours, fix the water pH between 7,2 - 7,6 using ASTRALPOOL - 10 pH Minus solid or ASTRALPOOL - 20 pH Plus solid.

The initial treatment will have to be repeated whenever you notice a lack of transparency in the water.

Maintenance Treatment: Once the pH level of the water has been adjusted, add from 1-3 grams of product for m^3 of water daily.

This dose is merely meant as a guideline and may be modified according to differing characteristics of the pool or climate.
