

## ASTRALPOOL – GELAMIN

### Cleans the pool basin

- Removes dirt, metals and lime from the pool surface
- Easy application on vertical surfaces
- Adheres to the surface

| GEL   | EFFICACY  | ALL TYPES OF POOLS   | DOSAGE                  |
|---|---|--|-------------------------|
|  |  |  | 1,5L / 10m <sup>3</sup> |

### PROPERTIES

|              |                                     |
|--------------|-------------------------------------|
| Appearance   | Dense liquid gelatinous consistency |
| Colour       | Purple                              |
| pH in supply | 0                                   |
| Density      | 1,05 - 1,09 g/cm. <sup>3</sup>      |

### CHARACTERISTICS

Acid detergent specially designed for the elimination of calcareous encrustations, organic residues and mineral sediments which form with time and which adhere to the surfaces of swimming pools

### INSTRUCTIONS FOR USE

Ensure the pool is drained. Moisten with water and apply undiluted product to the surfaces to be cleaned, using a brush or plastic roller. Let the product penetrate for approximately 1/2 hour and then rinse with abundant water until neutralization. If the encrustation persists, repeat the operation.

In areas where the incrustation is very acute, it is advisable to assist the action of the product by scrubbing the area with a brush.

### DOSAGE

The approximate consumption is about 1,5 liters for every 10 m<sup>3</sup> of the swimming-pool water, depending on the degree of dirtiness..
