

ASTRALPOOL – SURFACE CLEANER

Cleans de pool basin

- Removes dirt, metals and lime from the pool surface
- Special for liner and polyester pools

LIQUID	EFFICACY	SPECIAL FOR LINER AND POLYESTER POOLS	DOSAGE
			2L / 10m ³

PROPERTIES

Appearance	Liquid
Colour	Orange
pH (5% a 20°C)	0 – 1
Density	1,225 ± 0,02 g/cm. ³

CHARACTERISTICS

Liquid cleaning product specially designed for the elimination of calcareous encrustations, organic residues and mineral sediments which form with time and which adhere to the surfaces of swimming pools (beaches, floating lines, steps, etc.) built in polyester and fiberglass.

It is a product designed for cleaning the pool's glass. It works by rapidly penetrating and removing stains of oxides, fumes and various dirt.

INSTRUCTIONS FOR USE

1- General cleaning of empty swimming pools:

Apply undiluted product to the surfaces to be cleaned, spreading the product all over walls and bottom. Let the product penetrate for approximately 1/2 hour and then rinse with abundant water. If the encrustation persists, repeat the operation.

In areas where the incrustation is very acute, it is advisable to assist the action of the product by scrubbing the area with a brush.

2.- Surface Cleaning:

Use the product pure or in a 10-20% aqueous solution, depending on the type of dirt to be removed. Apply by spraying, flooding or soaking, leaving it to act as long as necessary.

- Do not use:

The product should not be applied on ceramic, vitrified, chrome, galvanized or tin-plated surfaces.

DOSAGE

Consumption of this product is 20L for each 100m³ of water.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
