

# ASTRALPOOL – FLOCCULANT CARTRIDGES

### Avoid turbid water

- Continuous improvement of water transparency
- Easy to use, without touching the product
- Improve filter performance

CARTRIDGES	DURATION	POOLS WITH SKIMMER AND SAND FILTER	DOSAGE
			1 CARTRIDGE UP TO 50m <sup>3</sup>

## PROPERTIES

Appearance	Solid
Colour	White cream
Dissolution in the skimmer at (28°C)	2 complete filtration cycle
pH (of a 1% solution)	5 max.

## CHARACTERISTICS

Flocculant tablets have the property of forming floccules in the water at the filter inlet, these floccules are deposited on the surface of the filter load retaining all suspended particles found in the pool water.

## INSTRUCTIONS FOR USE

Check that the pH of the pool is between 7,2 and 7,6. Once the pH has been adjusted, flush the filtration system and then place the necessary product cartridges inside the skimmer baskets.

## DOSAGE

- Pools from 10 to 50 m<sup>3</sup>: 1 tablet of product every 10 days.
- Pools from 50 to 100 m<sup>3</sup>: 2 tablets of product every 10 days.
- Pools from 100 to 150 m<sup>3</sup>: 3 tablets of product every 10 days.

These doses are for guidance only and can be modified according to the characteristics of each pool, climate, etc.
