

# ASTRALPOOL – WINTERIZER

### Complete treatment during winter

- Avoids the proliferation of algae, bacteria and the formation of lime
- Favors the beginning of the bathing season
- Non foaming

LIQUID	DURATION	ALL TYPES OF POOLS	DOSAGE
			500ml / 10m <sup>3</sup>

## PROPERTIES

Appearance	Liquid
Colour	Bluish green
Density	1,11 – 1,15 g/cm. <sup>3</sup>
pH	0 – 1.5

## CHARACTERISTICS

Product for the maintenance of uncovered pools during the winter period, avoiding the growth of algae and bacteria which cause unclean water calcareous sediments.

## INSTRUCTIONS FOR USE

With the pH value of the water between 7,2 and 7,6, pour the necessary dose of product directly into the pool water. Being necessary to put the filtration equipment into operation, long enough to obtain a good distribution of the product in the water.

## DOSAGE

When the bathing period is over and maintenance has not yet been abandoned, superchlorinate with ASTRALPOOL - 200gr Chlorine Shock (15 grs./m<sup>3</sup> ). The next day add 5 litres of winter treatment for 100 m<sup>3</sup> of water.

It is recommended that this process be repeated half way through the winter period.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
