AS-FIDS 2022-R1: FEATURE HIGHLIGHTS

Requirement	Solution
1 Adopt latest technology	Smart TV capabilities. No device constraints. All you need is a web browser
2 Save deployment costs	Web application with cloud deployment capability
3 Reduce through life ownership expenditure	Eliminate the need for proprietary Digital Display Control (DDC) licence
4 Enhance the visual experience for passengers	Dynamic real time information presented via multimedia formats
5 Greater integration with data sources	Connected standardised API facilitating plug n play
6 Improve user experience	Configurable template based content management
7 Generate extra revenue	Sell advertising space
8 Improve green credentials	Sustainable low energy ecosystem

ADOPT LATEST TECHNOLOGY

TAKE ADVANTAGE OF SMART TV APP BASED PLATFORMS TO ENHANCE THE DELIVERY OF CONTENT

Features:

- Clustered monitors for extended displays
- Display Videos, Graphics & Free text
- Timed sequencing for rolling displays

Benefits:

- Turn your Smart TVs into a stunning digital displays with vibrant multimedia output

SAVE DEPLOYMENT & MAINTENANCE COSTS

WEB APPLICATION WITH CLOUD DEPLOYMENT CAPABILITY

Features:

- Cloud compliant
- No device or operating system constraints
- No hardware vendor lock-in

Benefits:

- Centralised, remote monitoring
- Routine preventative maintenance and system upgrades can be carried out without interrupting service

REDUCE THROUGH LIFE OWNERSHIP EXPENDITURE

ELIMINATE THE NEED FOR PROPRIETARY DIGITAL DISPLAY CONTROL LICENCE FEES

Features:

- Multisite connectivity
- Centralised administration
- Designed to take advantage of energy efficient display units

Benefits:

- Significant reduction in through life ownership costs
- Eliminate the need to purchase/renew proprietary software

ENHANCE THE VISUAL EXPERIENCE FOR PASSENGERS

DYNAMIC REAL TIME CONTENT PRESENTED VIA MULTIMEDIA FORMATS

Features:

- Strong airport infotainment capabilities
- Smart wayfinding solutions to guide passengers across airports

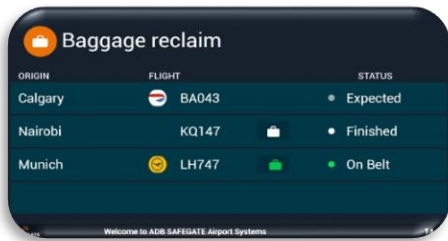

Benefits:

- A complete passenger information signage solution to keep visitors and passengers entertained
- Reduce missed flights and transfers, and cut demand on staff and customer service.

GREATER INTEGRATION WITH DATA SOURCES

STANDARDISED API FACILITATING PLUG N PLAY

Features:

- Interactive Applications
- Real time status updates from Airport Operational database
- Quick and efficient delivery of content via external web server interfaces

Benefits:

- Contributes to a more efficient airport, and promotes traveller satisfaction
- Optimise the target audience reach, reduce terminal congestion.

IMPROVE USER EXPERIENCE

CONFIGURABLE TEMPLATE-BASED CONTENT MANAGEMENT

Features:

- Configurable user interface designed to operate with minimum user interaction.
- Intuitive “What-You-See-Is-What-You-Get” page designer
- Emergency alerts & message boards

Benefits:

- Clear and effective communication
- Share real-time passenger information across airport digital signage network
- Perfect tool for broadcasting timely and effective evacuation and emergency instructions

GENERATE EXTRA REVENUE

SELL ADVERTISING SPACE

Features:

- Ability to stream smart digital ads across a network of displays anywhere
- Integration with retail information

Benefits:

- Monetise screen real estate
- Drive traffic to cafes and shops via smart digital ads

IMPROVE GREEN CREDENTIALS

REDUCE ENVIRONMENT FOOTPRINT IN A SUSTAINABLE WAY

Features :

- Versatile low energy eco-system replacement for legacy infrastructure

Benefits:

- Improve environmental credentials
- Reduce waste and increase automation
- Achieve corporate responsibility goals

COMING UP

Page designer

An innovative browser based tool for delivering content on smart display units

Usability enhancements

Administration tools for configuring smart displays, clusters, broadcast messages and emergency paging

Data integration

Operational and ancillary data management enhancements

Media management

For quick n easy uploading of videos and graphics via a web browser

Streamlined deployment

Cloud based Non-proprietary operational data solution with High Availability
